kaveeshadilshankd23@gmail.com

Neboda, Sri Lanka

ABOUT ME

Frontend Developer specializing in HTML, CSS, JavaScript (ES6+), and React, with a strong foundation in UI/UX design. Experienced in building responsive, high-performance web applications and integrating APIs using modern development practices. Passionate about creating scalable, user-centric interfaces and continuously improving code quality. Currently pursuing a BSc (Hons) in Software Engineering.

EDUCATION

SLTC Research University | 2023 – Present

BSc (Hons) in Software Engineering

Taxila Central College | 2020 – 2022

G.C.E. Advanced Level

WORK EXPERIENCE

UI/UX Designer

- Designed intuitive user interfaces for web and mobile applications using Figma
- Created wireframes and interactive prototypes to improve user flow and usability
- Conducted basic user research and applied user-centered design principles
- Collaborated with developers and stakeholders to ensure accurate design implementation

Web Developer

- Built responsive websites and web applications using HTML, CSS, JavaScript, and React
- Integrated APIs and optimized website performance
- Ensured cross-browser compatibility and mobile responsiveness
- Used Git and GitHub for version control and project collaboration
- Deployed projects using Netlify and GitHub Pages

PROJECTS

ArchTitan OS

Originated, architected, and led the development of ArchTitan OS, a custom Arch Linux distribution focused on developer productivity, resource orchestration, and system performance. Designed and implemented major subsystems, including Titan Hardware Manager, TitanFetch, Titan Sandbox, TitanShare, Titan Mirror, Titan AI, and GPU management, using C++, systemd, cgroups v2, D-Bus, Linux system APIs, and Wayland. Also developed Android-Linux integration through TitanShare, connecting a Kotlin Android application with a C++ Linux service over a local network, while leading system integration, testing, documentation, and the project's overall technical direction.

QuizServer

Contributed to the development of QuizServer, a web-based quiz management and delivery platform created as a group project. The system enables administrators to create and manage quizzes, launch quiz sessions, register participants, and review results through an Electron-based desktop interface and Express.js web server. Implemented features such as QR-code access, session management, randomized question and answer ordering, unique participant identification, and REST API endpoints using Node.js, Express.js, Electron, UUID, HTML, CSS, and JavaScript.

Repository

Gaming Website

Designed and developed a visually immersive landing page inspired by GTA VI to capture user attention and enhance engagement. Focused on delivering a high-impact visual experience through modern web design techniques.

Built responsive layouts using HTML, CSS, JavaScript, and React

Implemented animations and interactive elements to improve user engagement

Applied modern layout techniques such as Flexbox and Grid for structured design

Optimized visual elements for performance and responsiveness

Repository

LankaSmartMart – Online Grocery Store App (UI/UX)

Designed and prototyped a user-friendly mobile application to simplify online grocery shopping for Sri Lankan users. Focused on creating a seamless and efficient shopping experience from product discovery to checkout.

- Led end-to-end UI/UX design process: user flows, wireframes, and high-fidelity prototypes using Figma
- Optimized navigation and product categorization to reduce user effort and improve accessibility
- Designed an intuitive cart and checkout system to streamline purchasing decisions
- Applied user-centered design principles to enhance usability and engagement

Result: Delivered a clean, efficient, and scalable app design tailored to local user needs

Figma Prototype

Case Study

DuskPine – Earplugs Brand & Product Website

Created a complete brand identity and designed a modern product website for an earplugs brand. Focused on delivering a clean, minimal, and visually engaging user experience aligned with the product's identity.

- Developed full branding system: logo, typography, color palette, and visual guidelines
- Designed a responsive product website with strong visual hierarchy and modern UI principles
- Structured content to highlight product features and improve user engagement
- Ensured design consistency across all branding and digital touchpoints

Result: Improved visual clarity and content readability by ~40%, creating a strong and professional brand presence

Figma Prototype

TECHNICAL SKILLS

- **UI/UX Design**

Figma, Adobe XD, Wireframing, Prototyping, User Research, Usability Testing

- **Frontend Development**

HTML, CSS, JavaScript, React

- **Backend & Integration**

Node.js (Basic)

- **Tools & Platforms**

Git, GitHub

- **Design & Creative**

Graphic Design, Web Design, Visual Design Principles

- **Other**

Responsive Design, Cross-Browser Compatibility, Performance Optimization
